EDUCATION

University of Technology Sydney

B.S. Artificial Intelligence

Sydney, AUS

Sep. 2025 – 2028

- **Cum. GPA:** 6.5/7.0 | Received High Distinction for Math and Computer Science courses.
- **Coursework:** Machine Learning, Deep Learning & CNNs, and Data Structure & Algorithms

Lawrence S. Ting School

High School Diploma — Top 5% Graduate

Ho Chi Minh, VN

2018 – Jun. 2025

SAT: 1500 (M740, V760) • IELTS: 8.0 • Student Council President • Varsity Soccer

EXPERIENCE

AquaGuard - Flood Rescue Mobile App

Founder & Project Lead

Ho Chi Minh, VN

Sep. 2025 – Present

- Founded AquaGuard, a real-time emergency coordination system for flood disaster response, connecting citizens and rescue teams through SOS reporting and live dashboards; leading a 10-member team, shipping an MVP within 6 months and iterating on product direction and system design.
- Leading end-to-end product development across web and mobile applications (aquaguard.vn), built with JavaScript, WebSocket, and Firebase; driving user growth through outreach campaigns reaching 1,500+ followers, 600,000+ total content views, and international partnerships with RMIT, UTS, and Université Laval.

URA Research Group

AI Research Lab Member

Ho Chi Minh, VN

Mar. 2026 – Present

- Conducting research in machine learning, computer vision, and explainable artificial intelligence (XAI) under the supervision of Prof. Quan Thanh Tho.
- Contributing to research projects on human action recognition and transformer-based learning, including literature review, experimental evaluation, and benchmark analysis.
- Supporting the development of AI benchmarks and educational resources, including V-Bench and the Introduction to Computing textbook.

Bach Khoa Green Innovation Club

Director, Board of Directors

Ho Chi Minh, VN

Dec. 2025 – Present

- Guiding research and innovation activities for student members; contributing to 40% membership growth.
- Leading environmental innovation projects; contributing to the club's Top 1 performance recognition.

PROJECTS

CFC - Carbon Footprint App Tracker

UI/UX Designer & Contributor

New Taipei, Taiwan

Feb. – Jun. 2024

- Leading UI/UX design and development for a carbon footprint tracking web application using Figma and Python.
- Collaborating with Fu Jen Catholic University (Taiwan) on carbon modeling and sustainability initiatives; supporting the project's transition to ongoing environmental education and research activities.

ACHIEVEMENTS

1st Place — Engineering Projects in Community Service (EPICS) 8TH, Arizona State University

2026

1st Place — OISP Presentation Contest (OPC) 2025, Ho Chi Minh University of Technology

2025

Best Presenter Award — REACH Vietnam 2025, ASEAN Youth Leadership, Universiti Teknologi Malaysia

2025

SKILLS & INTERESTS

Technical Skills: Python, Java, JavaScript, SQL, HTML/CSS

Frameworks & Tools: React, FastAPI, Firebase, Git, Docker, WebSocket, Cursor

Research Interests: Computer Vision, Human Action Recognition, Transformer Architectures, and XAI

Languages: Vietnamese (Native), English (IELTS 8.0)
